

Why Should You Choose Injectech?

OUR MISSION is to develop a successful partnership with our customers by offering precision design, injection molding, and assembly services while focusing on quality, flexibility, and superior customer service.

1

We Don't Cut Corners

Injectech provides quality plastic fittings at competitive prices with trusted materials. All of our products are clean room manufactured with materials tested for medical applications and we do not use regrind materials.

2

Continuously Improving

Injectech adapts to the ever-changing demands of the medical industry. We are always making continuous improvements to ensure we're providing the latest fittings and engineering practices to customers.

3

We've Built Trusted Relationships

We work to create lasting relationships with not only our customers, but our community, shipping carriers, suppliers, distributors, and other various vendors to provide top quality components in a timely manner.

4

Commitment to our Customers

Customer success is our top priority. We offer flexibility, honesty, and integrity to companies of all sizes. Our team is committed to your solutions.

5

Flexibility is a Priority

At Injectech, we collaborate with you to achieve your product goals. We understand that changes occur and new needs arise so we are always prepared to find flexible solutions for your company that keep your project on track.

6

We Understand the End User

We provide solutions to the medical device and bioprocess markets and know how our parts contribute to medical procedures and life saving surgeries. This knowledge is a driving factor to always make trusted fittings.

7

Industry Leading Customization

We got our start by specializing in custom projects and we have not forgotten our roots. We welcome discussions about custom parts and molding. Injectech prides itself on flexibility and finding solutions to make your ideas a reality.

8

We Have Market Range

Our components have been designed to work in numerous medical markets. These include: Ophthalmic, Cardiac, Respiratory, Bioprocess, Diagnostic, Nuclear, and Orthopedic.

9

Industry Leading Manufacturing

Injectech's components are manufactured, tested, and assembled in class 8 cleanrooms. Our manufacturing and quality procedures conform to ISO 13485 requirements which include 100% visual inspection and leak testing.

10

We Have the Experience

Injectech has been providing high quality plastic injection molded medical device components for over twenty-five years out of our Fort Collins, CO facility. Our team consists of individuals that have had experience working for medical device OEMs, custom molders, and component manufacturers.
